Conservation inc.

Good practices to adopt

- Always Clean, Drain and Dry your boat when you change lakes. Lake Memphremagog has several washing stations* available.

- Practice sports generating oversized waves more than 250m away from the shore* and in water more than 5m deep*.
- Fill ballasts only when necessary.
- Less than 100m from the shore*, no driving at more than 10 km/h.
- There are other restrictions*: follow the instructions on the buoys!
- Stay away from light boats that are vulnerable to waves.

- Do not drive near sensitive areas (eg. aquatic weed beds)
- Do not feed wildlife (including ducks).

- Choose a quiet motor and minimize motor noise.
- Be respectful: limit the volume of the music to the needs of the occupants of your boat only.

- Drain your septic water at designated dump stations*.
- Never throw your garbage into the water.
